

Good Morning!

Attached you will find our preliminary re-entry framework.

The COVID-19 pandemic is a challenging and fluid situation. The preliminary framework we are sharing today is based on current recommendations and ongoing communications with the St. Louis County Health Department, local infectious disease experts, pediatricians, and medical experts in the St. Louis region regarding current conditions related to COVID-19.

As you review the framework you may have questions or wonderings. Please review the directory in the back of the framework and direct your questions to the appropriate district personnel. You may also email your question to vpquestions@vp.k12.mo.us. We are starting an FAQ page for families and will respond to questions as time and resources allow.

We have created this [webinar](#) to help you better understand the development of our plan, explain the learning options available to your student, and the changes with transportation and bell schedules.

I appreciate your patience as we navigate the start of the school year. Together I am confident we will find our way through the uncertainty and ultimately be Valley Park strong!

Please continue to take care of yourself and each other.

Sincerely,
Dr. Tim Dilg
Superintendent
