

VALLEY PARK SCHOOL DISTRICT

DISTANCE LEARNING: AT A GLANCE

PURPOSE

The purpose of our Distance Learning Plan is to maintain relationships with students and families and provide a level of instruction and care that maintains the students' current skills while providing reasonable learning opportunities for deeper depth of learning in essential content and exploratory and experiential opportunities in the arts and elective programming.

FLEXIBILITY

We recognize that each family dynamic and situation is unique. We are empathetic that many families may be experiencing different hardships and challenges at this time. Our faculty, staff, and administration are here for you and we aim to be flexible during this school closure period. Students have the flexibility to complete the weekly learning experiences during days and times that work best for each family's situation.

PERSONALIZATION

During this distance learning journey we will continue to provide a supportive and personalized environment in which students grow strong today, in preparation for tomorrow. In addition to teachers checking email daily, every teacher in the district will also be available three (3) days a week for 90-120 minutes for virtual office hours to support students academically.

CONNECTEDNESS

Our primary focus during this school closure period is staying connected to our students and families and extending our care to meet the social and emotional needs of our Valley Park Community while also providing academic opportunities. Each teacher in the district is expected to connect with students once a week using district approved communication methods.
